Product Specification

90mL Sterile Screw-Cap Container with Temperature Strip Part #39405

The #39405 container is specifically designed for the safe, secure collection and transportation of biological specimens for laboratory evaluation. The container features accurate, easy-to-read, molded-in graduations on three sides. Top and bottom ribbed etchings ease the opening and closing process when wearing examination gloves. Each container is leak-resistant and 95kPa compliant when closed properly. Temperature strip provides verification that the specimen was indeed within temperature expectations, eliminating doubt at the point of collection that a specimen was subject to adulteration.

Part #:	39405
Description:	90mL Sterile Screw-Cap Container with Temperature Strip
Dimension (each):	60mm (height) x 53 mm (diameter)
Weight (each):	17.5 grams
Material:	Non-Absorptive Polypropylene
Packaging:	400 containers per case
Country of Origin:	USA/Southern California
